

# MUZZLE DISCIPLINE

## HIGH READY

Keep the muzzle at eye level and between them. The angle is proportional to the distance from the enemy.

## SOUTH/LOW READY

Muzzle pointed downwards relative to the horizon, can get closer until touching the body, forming the south position.

## TEMPLE INDEX

It should only be used as a last resort. Keep the weapon supported against the temple, pointed upwards.

## REMEMBER

# 1

The muzzle control positions serve to ensure that you do not point your weapon at a target you do not intend to hit.

# 2

They aim to protect the target, not the shooter.

# 3

Remember to prioritize your survival in armed combat. Don't remove your weapon from combat without necessity.
