

Security and

VEHICLES

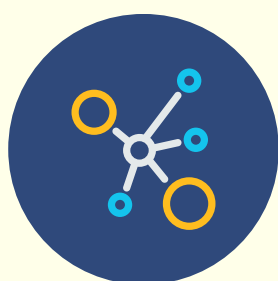

MAINTENANCE

Ensure that the vehicle is always in a condition to run. Perform regular maintenance, oil changes, tire inflations, and keep the fuel tank filled with at least 50% of its capacity.

YOUR TEAM

Make the most efficient use of your team's assets. Separate individuals who are frequently in the same vehicle as you according to their skills and capabilities.

PLANNING

Plan your route, avoiding more violent areas and paying special attention to choke points. Of course, continuously develop your driving skills and understand the technical limits of your vehicle.

GMD

Blend into the crowd. Don't attract attention. Practice the Gray Man Directives.

FIGHT

You will only need to fight if all the previous steps fail. Remember to do so with intelligence. Battles need to be won with brains, not with weapons.
